Summary

Front-End Platform engineer with 7+ years building scalable TypeScript/React web applications and reusable component libraries. Experienced with Webpack, CI/CD, Core Web Vitals, Frontend SLOs, and AI-assisted code generation to accelerate delivery.

Work

Senior Software Engineer Aug 2022 - Present

Indeed.com | San Francisco, CA

- Migrated to OneHost microfrontend platform (Webpack 5 module federation) to enable reusable component library and scale consumer web experiences; automated CI/CD and mentored ~12 engineers to accelerate deployment cadence.
- Operationalized Frontend SLOs with SRE and Product, reducing customer-facing incidents for consumer features.
- Applied AI-assisted code generation and model-assisted workflows to speed delivery; architected a gRPC third-party integration platform and shipped a TypeScript/React Manifest V3 analytics troubleshooting extension.

Staff Software Engineer Sep 2021 - Aug 2022

IBM | San Francisco, CA

- Modernized IBM Developer site with React and Webpack, improving SEO and Core Web Vitals (TTI/FCP) across devices.
- Optimized Webpack to halve build time, improve rebuild/hot-reload 29x, and shrink bundle from 6 MB to 300 KB.
- Designed and launched a Watson Media video upload pipeline to streamline advocate video publishing.

Software Engineer May 2019 - Sep 2021

IBM | San Francisco, CA

- Delivered a modernized customer service agent portal (API caching → ~30% faster avg response) and built the GolfTV Graph API with Apollo on AWS to improve data reliability for client integrations.

Application Development Intern Jun 2018 - Dec 2018

J.B. Hunt | Fayetteville, AR

- Built cross-platform React Native features and added Jest/Appium test suites to raise release confidence.

Education

University of Arkansas Jul 2017

Bachelor of Science Biological Sciences

GPA: 3.9

Skills

TypeScript, JavaScript, CI/CD, React, HTML5, CSS3, Web Applications, Component libraries, Webpack, Build Systems, Performance optimization (Core Web Vitals), AI-assisted development / model-assisted workflows
